

DECK WINCH Model DW-15013-40S

The SOSI Model DW 15013-40S Deck Winch has been designed for large towed body shallow deployment, and similar marine operations. It is typically used with the SOSI Model 162-100-001 Towfish Launch & Recovery System. The large diameter, narrow drum design does not require a levelwind for most applications. It is ruggedly designed for ship-board use and is easy to install on your own vessel or on vessels of opportunity. Its quality steel construction and epoxy finish provide long life even in the harshest marine environments. Its simple design and proven components assure reliable operation that you can depend upon. The Model DW-15013-40S Deck Winch is supplied with a separate hydraulic power unit and can be acquired with standard and optional features as listed below.

Standard Features

- Geared Hydraulic Chain Drive
- Failsafe Hydraulic Brake
- Separate Hydraulic Power Unit
- Stainless Fasteners & Fittings
- Dog Pin for Extended Towing
- Epoxy Finish
- Integral Fork Lift Pockets

Options

- Manual Band Brake
- Slipping Assembly
- Levelwind
- Cable Speed, Scope & Load Displays
- Stainless Quick Disconnect Fittings
