

HYDRAULIC POWER UNIT Model HPU-120

The SOSI HPU-120 Hydraulic Power Unit is a self-contained, marine grade, 120 Hp electro-hydraulic device that can be used to support a variety of marine equipment such as linear cable engines, winches, and launch & recovery systems, etc. These power packs are easy to install on your own vessel, or vessels of opportunity. Their high quality components, NEMA 4X electrical enclosures, rugged steel frame construction and epoxy finish provide long life even in the harshest marine environments. With oil filters, heaters, and coolers as standard items, these HPUs provide reliable operation that you can depend upon almost anywhere in the world. The HPU-120 Hydraulic Power Units can be acquired with a variety of standard and optional features as listed below.
