

STANDARD TOW WINCH

Model STW-1018L-7.5

The SOSI Series STW-1000 Standard Tow Winches have been designed for small towed body operations. They are highly portable, light weight and easy to install on your own vessel, or vessels of opportunity. Their high quality, rugged aluminum construction and epoxy finish provide long life even in the harshest marine environments. Their simple, low-maintenance design and proven components insure reliable operation that you can depend upon. The Series STW-1000 Standard Tow Winches can be acquired in a variety of drum widths with standard and optional features as listed below.

Standard Features

- Electro-Hydraulic Drive
- Integral Hydraulic Brake
- Manual Control Valve
- Stainless Piping & Fittings
