The SOSI Series UHR-20x28x32 Umbilical Hand Reels are designed for the storage and deployment of small cables such as ROV umbilicals and instrument tethers. These hand-operated storage reels are lightweight and come with integral hand holds for easy portability and lifting. UHRs are slip ring compatible. Their open-drum design allows for easy core access during cable installation. They are constructed of superior marine-grade polymer sheets, environmentally stabilized to resist harsh sun and sea conditions, including ultraviolet light. The SOSI UHR's low maintenance, simple design and proven material insure reliable operation that you can depend upon. Their high-quality construction provides long life even in the harshest marine environments

SOSI would welcome an opportunity to become an equipment supplier for your company. The Series UHR-20x28x32 can be acquired in a variety of drum widths with standard and optional features as listed below. If you can provide us with a description of your hand reel requirements, we will be happy to respond with a recommended solution. In addition to designing and building your winch system. SOSI can design and manufacture the individual components to complete your own build or replacement components for our systems. <SOSI>
